

BAKUP-USA

Installation Guide

HONDA 1800C VTX Driver's Backrest

1. Remove the seat and put in safe place.
2. Remove the nuts that hold the pillion seat to the rider's seat and separate the two seats.
3. Remove the two metal inserts that are located in the rubber garments on the bracket that holds the pillion seat.
4. Install the new inserts that are supplied with your backrest.
5. Place the backrest over the front edge of the pillion seat so that the two studs pass through the holes in the bracket of the backrest.
6. Rejoin the pillion seat and the rider's seat, reinstall on your bike. Adjust up/down, forward/back to your liking.
