

BAKUP-USA

Installation Guide

Yamaha FJR Driver's Backrest 06 Model

1. Remove the driver's seat.
2. Remove the two (2) screws that attach the front of the passenger seat.
3. Place your backrest so that the holes on the backrest align where the front passenger seat attaches.
4. Re-install the screws for the passenger seat.
5. Install the screw (supplied with your backrest) through the hole on the center support and cross member of the bike, install washers and nuts on the bottom and tighten all screws.
6. Re-install the driver's seat and adjust to your liking.
